

Your health this winter

Last updated: **December 12, 2024**

Introduction

With cooler temperatures, shorter days and the flu and cold season, winter may bring changes to our health. Many of us may find it hard to get enough physical activity. Snow and ice can create hazards that can make walking, playing and working outdoors difficult. Many of us will come down with the flu or catch a cold. Throughout the winter, it is important that we continue to stay active, eat healthy, and take care of our families and ourselves.

Be prepared

Cold weather alerts

Environment and Climate Change Canada (ECCC) issues cold weather alerts to help the public stay informed about hazardous conditions. Stay updated by visiting the [Government of Canada's Severe Winter Weather Alerts page](#) or downloading the [WeatherCAN app](#).

Emergency preparedness

PreparedBC is British Columbia's one-stop shop for disaster readiness information. For tips on seasonal readiness, how to prepare an emergency plan and what to include in an emergency kit, visit PreparedBC: Public emergency preparation and recovery - www2.gov.bc.ca/gov/content/safety/emergency-management/preparedbc.

- Follow PreparedBC on [Facebook](#)
- Follow @PreparedBC on [X \(formerly Twitter\)](#)

For emergency info BC advisories, visit: www.emergencyinfobc.gov.bc.ca

Emergency shelters

BC Housing: [Emergency shelters program](#) provides a temporary place to sleep, eat and wash for anyone who is homeless or at risk of homelessness. Some shelters may offer additional services such as meals, secure areas for belongings and a resource room with computers, phone or TV. Access to medical support, support staff and individualized help from a caseworker may be available. Find emergency shelter information and resources, including extreme weather shelters here:

- [BC Housing: Shelter map](#)
- BC2-1-1: [Shelter and street help line](#)

Warming centres

Warming centres and emergency shelters can provide protection from [Hypothermia and cold temperature exposure](#) during extreme cold weather. Emergency warming centres and general

warming spaces locations may be listed on [EmergencyMapBC.ca](https://www.emergencymapbc.ca) at the discretion of First Nations and local governments. If warming centres are not listed on the map in your area, contact your band office or local government, or visit [CivicInfo BC: Directories](#) or visit [BC Housing](#) for temporary winter and extreme weather response shelter information website.

Featured topics

Common illnesses and injuries during winter

Cold and flu, and some other conditions and illnesses are more common or worse during the winter months. The holidays can also be a stressful time for many people and may cause some of us to experience seasonal affective disorder (SAD). In addition, snow and ice can create hazards that increase the risk of falling and hurting yourself. To learn more about some of these common conditions, please visit [Common illnesses and injuries during winter](#).

Cold weather

Throughout the winter, temperatures will drop and it may be very cold outside. Learn about cold exposure and the steps you can take to protect yourself and your family:

Healthy living during winter

Healthy eating and physical activity promote and support social, physical and mental well-being for everyone, at all ages and stages of life. For advice on what you can do to live a healthy lifestyle, visit the [Healthy living during winter](#) page.

When to visit the emergency room

The Emergency Room (ER) in hospitals can be very busy during winter months. Prepare and learn when you or a family member may need to use the ER. To learn more, see:
